*Provide a brief description of how assessment results have been used for program improvement. Point to a specific example of how an assessment provided the program with data it could use for improvement and what that improvement was, if possible, also show evidence of the improvement. You may look at data from the two previous academic years to support this case.*

Respond here:

The analysis of student reflections provided data that indicated that students desired opportunities to review and analyze quality exemplars. Consequently, discussion prompts were reshaped into sharing boards in the EDLD 5339 – The Principalship course where the instructional delivery was flipped. Students analyzed exemplars and shared their findings with their colleagues in the class. While the content of the assessment was not amended, engagement of students was enhanced to provide opportunities to collaborate in an online setting. Students were challenged and invited to share their work to be used as exemplars in future sessions. It was exciting to see the improved quality of work that this opportunity provided. The top students were particularly excited by this invitation. Students continue to perform well on this assessment as demonstrated on the consistent level of “Meets Expectations.” However, there was an increase in student satisfaction in the course as demonstrated in course evaluation data from the students.

In addition to data regarding mastery of standards, faculty monitor student perceptions of the course work using reflection data. This year, the course designers met with a small group of students to discuss their perceptions of the School, Family, Community Partnership activities in a focus group. A data informed decision found that the School Family Community Partnerships assessment was contextually revamped to better align with the other simulated assignments/activities in the course. For example:

1. The candidates simulated being the principal at Ima Leader High School. This same assumption is used throughout the course activities and contextually links the activities.
2. The School Family Community Partnership assessments activities were embedded in a hypothetical setting where the principal was charged with improving community partnerships following a simulated tragedy in their community or school. Student reflections and communications indicated that the change was well received, and that the relevance of the activities was enhanced.

*Identify and briefly discuss any programmatic curriculum changes made since the last report (e.g., new courses, course changes, SLO changes, course deletions).*

Respond here:

No programmatic curriculum changes were made since the last report.

						* What do the data tell you? How will you use this data? How were data from the last cycle used to make changes during this cycle, and What were the results of those changes?
Use Smartsheet for record this data. Do not fill out this table.						
Students will demonstrate knowledge and application of constructs of School Culture, Leading Learning, Human Capital, Executive Leadership, Strategic Operations, and Ethics, Equity and Diversity.	Students will demonstrate knowledge and application of constructs of School Culture, Leading Learning, Human Capital, Executive Leadership, Strategic Operations, and Ethics, Equity and Diversity. Rationale: These learning outcomes are aligned with Texas State Principal Standards and tested competencies for principal certification. The State Board for Educator Certification (SBEC) established standards for all professional State	Principal as Instructional Leader Certification Exam: Students must score a minimum of 240 to pass the assessment. Rationale: A score of 240 of a possible 300 is the minimum passing score for the Principal as Instructional Leader Certification Exam. <p>academic year (2023-2024). Data will be analyzed for effectiveness of Certify Teacher's preparation for the TExES 268 certification exam. Adjustments will be made based on data analysis.</p>		<p>program for exam preparation. Adjustments will be made based on data analysis.</p>
<p>This year, faculty have melded the assessments of NELP Components 6.1, 6.2, and 6.3 into one NELP Standard 6 assessment to better quantify student achievement and engagement. It is felt that streamlining the assessment would place more emphasis on student learning and modes of instructional delivery.</p>	<p>P</p>	<p>Individual NELP Components measured for mastery in this assessment maintained their mastery rate of at least 90%. The melding of performance from the stand-alone components will provide more actionable data to better frame instruction. For example - professors use oral discussions to review articles from journals in the NELP Standard 5 activities located in this same course. There has been discussion about how to incorporate that model, or one similar, to engage students in the evaluation NELP Standard 6 exemplars. This includes how to best use exemplars as part of the discussion boards.</p>
<p>Qualitative data suggest additional and/or targeted required readings from current professional journal articles on this assessment's topic would enhance students' knowledge and depth of understanding. Faculty will investigate possible improvements in the literature reading requirements for this assessment.</p>	<p>P</p>	<p>Faculty feel that more recent professional journal articles that reflect current research will provide students with an increased understanding of best practices to date.</p>
